Subject: Microsoft Settlement

Microsoft has been "playing dirty" for a very long time...at least the past 10 years, if not longer. Do you really think they don't have a plan for working around a self-proposed settlement? Let's not be so naïve.

The only way you're going to keep them from cheating is to split them up and make them compete against themselves. Otherwise they will continue to use their dominance in some markets to destroy good competitors in other ones.

Michael
